

# Department of Statistics 2019: Mapping Inequalities Online

## Using GitHub Data

Candidate Number: 10140

**Contents**

**1 Introduction** **1**

**2 Brief Literature Review** **2**

    2.1 A Summary of the Research . . . . . 2

**3 Datasets I Have Found** **3**

**4 Empirical Methodology** **4**

    4.1 Empirical Model . . . . . 4

**5 Recommendations for Further Research** **6**

**6 Concluding Remarks** **7**

**7 References** **8**

List of Tables

1	Learner achievement (%) . . . . .	4
---	-----------------------------------	---

List of Figures

1 Cumulative graph for subject scores . . . . . 4

# 1 Introduction

## 2 Brief Literature Review

### 2.1 A Summary of the Research

Brinton *et al.* (2014)

Stadtfeld *et al.* (2019)

Currarini, Jackson and Pin (2010)

### 3 Datasets I Have Found

## 4 Empirical Methodology

### 4.1 Empirical Model

This is an equation:

$$A_{it} = f(T_i^{(t)}, S_i^{(t)}, P_i^{(t)}, B_i^{(t)}, I_i), \quad (4.1)$$

Table 1: **Learner achievement (%)**

Subject	Mean	Q1	Median	Q3
Maths	27	15	23	35

Source: Own calculations in Stata using 2004 Grade 6 Intermediate Phase Systemic Evaluation.

Figure 1: **Cumulative graph for subject scores**

Source: Own calculations in Stata using 2004 Grade 6 Intermediate Phase Systemic Evaluation.

Again, you can reference the figure in-text: figure 1 is a figure and it displays etc. etc. etc.

This is an organic figure generated with an R chunk that is executed when the document is knitted (the image is also saved in the folder `final-article-template_files`):

Regarding R chunks: If you want a chunk's code to be printed, include `set echo = TRUE`. `message = FALSE` stops R printing package loading details and setting `warning = FALSE` should suppress most warnings.

## 5 Recommendations for Further Research

## 6 Concluding Remarks
